

Quick Installation Guide

NO. G03-JC386MZ93QIG-F

Manual Revision: 2.0

Release Date : March 27, 2023

I/O Outlets

Front

Rear

Dimension and Outlines

1. To disassemble the Chassis

1. Locate the screws at the spots marked on this side of the system and unscrew them one by one.

2. Remove the marked screw on the rear IO panel.

3. Remove the marked screw on the front IO panel.

4. Lift the cover up to open the chassis.

5. The internal structural view of the system for further intallation.

II. Installation for GPIO Extension

1. Locate the GPIO termial blocks for extension on the front IO panel.

2. Use a screwdriver to remove the screws on the marked spots for further installation. The product showed above comes with two GPIO extension blocks (Please lock them back to the original positions after wires connection made).

3. Press down the orange key and then insert GPIO wire into the corresponding GPIO socket, as the photo shows.

4. Release the orange key to secure the GPIO wire installed, as the photo shows.

III. To install SIM card

1. The reserved SIM slot is hidden in the marked frame.

2. Remove the screw in the marked spot to disassemble the protective shield from the panel.

3. Insert the SIM card into the reserved SIM card slot, with the IC side up, as the photo shows.

IV. To Install Wi-Fi Card

1. Locate M.2 PCIe slot on the board.

2. Remove the marked screw and use it to lock compatible card to the slot in later installation.

3. Insert the gold-figure side of the compatible card into the slot and press down.

4. Secure the card to the board by tightening up the screw to the marked spot.

5. Locate the reserved antenna holes on the back panel. Remove the dust-proof plugs on the marked spots from the panel to install the antenna, as the following details show.

6. Push this antenna head into antenna hole of the rear panel from the backside of the panel.

6-1

The washer① & the hexagonal screwnut②.

6-2

Push the washer① through the antenna head.

7. And then lock the antenna head to the front side of the rear panel with the hexagonal screwnut② and tighten it up.

8. Press the metal hat on the end of the antenna string to corresponding antenna slot on the card as shown.

9. The rear panel with antenna heads installed.

10. Connect the external Wi-Fi receiver antenna to the antenna connector on the rear panel.

V. To Install SO-DIMM to the board

1. Locate the SO-DIMM slot on the board.

2. Insert the gold-figure side of the compatible SO-DIMM into the slot at a 30 degree.

3. Press down to secure the SO-DIMM to the slot. The eject tabs will lock automatically if installing direction is correct.

VI. To Install M.2 SATA Card

1. Locate the M.2 SATA slot on the board. System supports two types of M.2 card in different lengths (2280/2242). Prepare compatible M.2 SATA card.

2. The reserved screw is installed in the spot reserved for 2280 card. In the case that you wish to install 2280 card, please remove the screw at first.

3. Insert compatible 2280 card into the slot.

4. Tighten up the screw removed before to the marked spot to secure the card.

5. For 2242 card installation, please remove the screw and the screw bolt underneath from the default spot MH4 to MH2 at first.

6. Tighten up the screw bolt & attached screw to MH2 spot, as the marked frame shows.

7. Remove the screw at first when you are ready to install 2242 card.

8. Insert compatible 2242 card into the slot.

9. Tighten up the screw removed before to the marked spot to secure the card.

Declaration of Conformity

FCC Statement

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at user's own expense.

**Note: 1. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. 2. Shielded interface cables must be used in order to comply with the emission limits.*

CE Notice

The product described in this QIG complies with all applicable European Union (CE) directives if it has a CE marking. For computer systems to remain CE compliant, only CE-compliant parts may be used. Maintaining CE compliance also requires proper cable and cabling techniques.
